## Building Fraction Sense Using "Fractions Intro PhET Simulation"

By the end of this lesson, you will be able to:

- Identify parts of a fraction and explain similarities and differences between types of fractions.
- Represent fractions through a variety of different representations.

1. Go to https://phet.colorado.edu/en/simulation/fractions-intro. Play with the Intro tab for 5 minutes.

Write down at least three things that you observed.
-
-
-
-
2. Fill out the table with your observations.

| What happens when you change the numerator (top <br> number) of the fraction? | What happens when you change the <br> denominator (bottom number) of the fraction? |
| :--- | :--- |

II) AND
3. Use the Fractions Intro Simulation to fill out the missing information.

|  | Circle | Rectangle | Number Line | Proper Fraction |
| :---: | :---: | :---: | :---: | :---: |
| a. |  | $\square$ | $\begin{array}{ll}\square \\ 0 & \\ \\ \end{array}$ |  |
| b. |  |  | $\begin{array}{ll}1 \\ 0 & \\ \\ \end{array}$ |  |
| c. |  |  | $\begin{array}{ll}1 \\ 0 & \\ \\ \end{array}$ | $\frac{3}{5}$ |
| d. |  | $\square$ | $\left.\right\|_{0} ^{1}+\ldots \ldots \ldots-1$ |  |

4. In the table above, label the largest and smallest fraction. Explain how you know.
5. Describe in words and then show how you can put $\frac{2}{3}$ fraction on a numberline.
6. Use the Fractions Intro Simulation to fill out the missing information.

Make sure that you click the "Mixed Number" checkbox on the simulation.

(II) AND
7. Discuss the following with your partner/group and write down your ideas.
a. What are the similarities and differences between a proper and improper fraction? (Look at Tables 1 and 2)

| Similarities | Differences |
| :--- | :--- |
|  |  |
|  |  |

b. What are the similarities and differences between an improper fraction and a mixed number? (Table 2)

| Similarities | Differences |
| :--- | :--- |
|  |  |

c. How would you convert $2 \frac{3}{5}$ to an improper fraction?
d. How would you convert $\frac{13}{5}$ to a mixed number?

Fractions Intro, 2018 (Chu and Guegan)
